

Doran Scales Inc.

2200G Grading Scale

Doran's 2200G Grading Scale system provides outstanding features, performance and capabilities. User programmable grade settings give the ultimate flexibility for any grading application.

Designed to meet the demands of seafood, poultry and meat processing, the Doran 2200G provides a large, easy to read visual grade and weight indication and can easily interface with visual or audible alarms to help operators quickly determine the product grade.

The Doran 2200G provides outstanding communication capabilities. Weight, product ID, grading information and other scale information may be transmitted via the two standard RS-232 Com Ports. Data can also be transferred via one of the optional communication modes, including: Wired Ethernet, Wireless Ethernet, 4-20ma, Modbus TCP, USB, and Fiber Optic.

Features:

- Large 0.5" Grade indicators
- Eight user defined grades
- IP69K Washdown Protection
- Heavy Duty Stainless Steel Construction
- Guardian Touch Panel that is four times thicker than the competition
- Quad Spring base protection system providing 1000% of overload capability

Applications:

- Seafood
- Poultry
- Meat

Available Scales:

- 2200GM Grading Scale Indicator
- 2200G Grading Scale System

For more detailed information on the 2200G indicator and available scale system sizes and capacities please refer to the Doran Scales 2200CW literature.
